

as a guest at VIA, Basel

**Video Art in Dialogue, series of events: 17, 24 und 31 January 2025**

## **MEDIA INFORMATION**

The nomadic platform for Video Art called VIDEO WINDOW is delighted to present, in cooperation with the legendary studio community VIA, nine well-known artistic positions from Zurich and Basel. During three evening events entitled *Video Art in Dialogue*, each position shows a recent work for discussion in the video studio of the association, which has played an important role as a nucleus for Swiss video and performance art since the end of the eighties.

The aim of the events is to comparatively debate artistic interests, strategies and forms of expression exemplified by the videos and a workshop-like dialogue between the artists, the curator and the public and to jointly discover the multifaceted nature of video art.

A special issue of the *\_957 Independent Art Magazine*, which has been published by the well-known Lucerne artist Stephan Wittmer since 2012, will appear as a publication and programme booklet for the series.

Each evening will conclude with the opportunity to continue the discussion and to network over a plate of pasta at the venue.
